Mathematics	6.7 - Fractions, Decimals and Percentages <ul style="list-style-type: none"> • Working with equivalences between simple fractions, decimals and percentages. • Calculating decimal fraction equivalents for a simple fraction by considering fractions as divisions. • Multiplying simple pairs of proper fractions, giving answers in simplest form. • Dividing proper fractions by whole numbers. 		

	<p>6.9 - Converting Measures</p> <ul style="list-style-type: none"> • Converting between standard units of length, mass, volume and time. • Solving problems involving converting between units of measure. • Converting between miles and kilometers
Context	<ul style="list-style-type: none"> • Technology can have a big influence on people and communities, changing how we communicate, learn, work and live our daily lives. • New technologies raise important questions about what is right and fair, including how personal information is used, who is responsible for decisions, and how technology should be used safely and respectfully. • Not everyone has the same access to technology, and this can affect people’s education, opportunities and quality of life. • Technology can impact the environment, for example through energy use, electronic waste and the materials used to make devices. • Technology should be thought about carefully, helping children to question, evaluate and make responsible choices rather than using technology without thinking.
PE Day and Activities	Friday - Gymnastics
